Diver Medical | Participant Questionnaire

Recreational scuba diving and freediving requires good physical and mental health. There are some medical conditions which can be hazardous while diving. Those who have, or are predisposed to, any of these conditions, should be evaluated by a physician. This Diver Medical Participant Questionnaire provides a basis to determine if you should seek out that evaluation. If you have any concerns about your diving fitness not represented on this form, consult with your physician before diving. If you are feeling ill, avoid diving. If you think you may have a contagious disease, protect yourself and others by not participating in dive training and/or dive activities. References to "diving" on this form encompass both recreational scuba diving and freediving (breathhold diving). This form is principally designed as an initial medical screen for new divers, but is also appropriate for those considering any diving activity. For your safety, and that of others who may dive with you, answer all questions honestly.

Directions

Complete this questionnaire as a prerequisite to a recreational scuba diving or freediving course.

If you answer NO to all 10 questions below, a medical evaluation is not required. Please read and agree to the participant statement below by signing and dating it.

*** If you answer YES** to questions 3, 5 or 10 below **OR** to any of the questions on page 2, please read and agree to the statement above by signing and dating it **AND take all three pages of this form (Participant Questionnaire and the Physician's Evaluation Form) to your physician** for a medical evaluation. Medical evaluation is required.

Note to women: If you are pregnant, or attempting to become pregnant, *do not dive*.
